

BUSINESS MANAGER JOB AID

The Business Manager’s involvement in work requests will normally begin with an e-mail from Archibus stating their approval is required on the request. First, the Business Manager will log into Archibus to access the request needing approval.

1. Once logged in, click on “Approve/Review Active Work Requests” on the Business Manager Home screen. This action will take you to the Building Operations Console where approval or rejection can be accomplished.

2. From the Building Operations Console, the Business Manager can click on the Work Request Number to view the details of the request. They may also change the GL Account or Fund Code ID if needed (see below). Work Description will also be editable. Here, you can add information such as estimate requests. If any changes are made, you must click “Update Request” to save the information.

3. Click the "Approve/Reject" button to take the appropriate action with the work request. A small window (as seen below) will appear.

4. The Business Manager may approve or reject the work request by clicking the appropriate button in the new window. They may also add comments related to the work request. Should the Business Manager select Reject, the work request will be removed from the system.

Reporting for the Business Manager

Note 1: “Review All Billed Work” shows only transactions billed in IRIS. See next page for an example of the new window which will appear.

Note 2: “Review All Closed Work” shows transactions billed in IRIS and work done with no charge. See next page for an example of the new window which will appear.
