Congratulations to our July Exceptional Team - SERF Outage Respond-

We would like to extend a well-deserved thank you to the more than 80 members of our team, who worked tirelessly during the power outage June 29 that impacted SERF.

These employees worked around the clock, even sleeping on campus, before going back to work during the 60 hours it took to restore power.

The efforts to restore power to this critical research building was a team effort within Facilities Services, and everyone swung into action immediately.

It is our team members’ extensive knowledge of our campus buildings and expertise that helped to save the research of more than 170 faculty members in SERF.

Our staff knows the buildings on campus better than anyone. As they worked to get power back up, they were able to anticipate setbacks and attempt different solutions in a way no outside company could.

Other than restoring power, many team members provided other essential services during the outage.

Locks were changed to ensure building safety and staff members then escorted faculty into the building, miles of cable were run to temporary power equipment, emergency provisions were distributed to our team, and UT Alert was used to continually communicate with all those impacted by the emergency.

Our team members knew how to respond when not only the main service, but also the building’s emergency systems were inoperable, and they knew where critical equipment is located as well as the fact that much was not hooked into emergency systems.

We had key parts on hand so we did not have to wait for emergency equipment deliveries in order to begin repairs, and engineering and emergency contracts were in place so outside consultants could immediately provide any assistance needed.

Due to these efforts, all team members who worked to restore power and assist during the outage have been named the July Exceptional Team.

Thank you again to the following individuals who helped during the outage and congratulations on being named a member of the July Facilities Services Exceptional Team.
